

IN THE CLAIMS

1. (Currently Amended) A method for ~~inhibiting~~ regulating the ~~amount of~~ body weight ~~gained after eating of an animal~~, comprising: feeding to an animal a fat-containing diet and an effective amount of a liposome-encapsulated immunoglobulin against lipase effective to inhibit body-weight gain.
2. (Previously Presented) The method of claim 1 wherein the immunoglobulin is an avian antibody.
3. (Original) The method of claim 2 wherein the avian antibody is part of a diet containing wet liposomes or freeze dried liposomes.
4. (Original) The method of claim 1 wherein the animal is mammal.
5. (Original) The method of claim 1 wherein the animal is an avian.
6. (Previously Presented) A mammalian food composition comprising fat and an effective amount of a liposome-encapsulated immunoglobulin against lipase and effective to inhibit body-weight gain.
7. – 8. (Cancelled)
9. (Previously Presented) The food of claim 6 which contains 25 – 100 mg/kg of the liposome-encapsulated immunoglobulin against lipase.
10. (Previously Presented) An avian food composition comprising: fat and an effective amount of a liposome-encapsulated immunoglobulin against lipase effective to inhibit body-weight gain.
11. (Previously Presented) The food of claim 10 which contains 25 – 1000 mg/kg of a liposome-encapsulated immunoglobulin against lipase.
